PROFILE

I am a student at Tarumanagara University with a GPA of 3.8, with a strong interest in Information Technology and software development. I have experience developing various applications and websites using different technologies and have developed strong problem-solving and teamwork skills through academic and personal projects. I am currently seeking an internship opportunity in the IT field to further develop my technical skills, gain professional experience, and contribute to a dynamic work environment.

ORGANIZATION EXPERIENCE

Moderator of Toefl 2026

May 2026 - June 2026

Tarumanagara University, Jakarta

Coordinated event activities as a member of the Event Division, moderating sessions, managing speaker spotlights, and monitoring TOEFL test participants to ensure a smooth and organized event.

Open House FTI Untar 2026

August 2026 - October 2026

Tarumanagara University, Jakarta

Coordinated event operations during the Open House and served on the games committee, managing game activities according to the event rundown.

PROFESSIONAL EXPERIENCE

Freelance E-Commerce Seller — Automotive Spare Parts

April 2025 - Present

- Managed an online store specializing in automotive spare parts through Shopee.
- Managed product listings, including product information, pricing, stock, and product updates.
- Processed customer orders and coordinated order fulfillment and shipping.
- Communicated with customers to provide product information and handle inquiries.
- Monitored sales and inventory to support efficient store operations.

PROJECTS

CodeQuest - **Flutter | React js | Node js | MongoDB | Clodinary | Vercel**
Developed a fun and interactive application accessible on both mobile devices and websites, designed to help high school students learn coding without feeling bored.
Link Github : https://github.com/Gunadi-kripto/CodeQuest-.git

Ponti Jaya Motor Shop | Next js | React js | Node js | Mongo db | Cloudinary | Vercel
Developed an e-commerce website for buying and selling Bajaj spare parts to support a small business, improve operational efficiency, reduce platform-related costs, and increase profit margins.
Link Github : https://github.com/Darrell30/Ponti-Jaya-Motor.git

Quick Food Delivery App | Flutter | Dart | MongoDB | Cloudinary
Developed a food delivery application that simulates online food ordering, integrating Google Maps using the Google Maps API to provide location-based functionality.
Link Github : https://github.com/Darrell30/Food-Delivery-App.git

Kampus News| Laravel | PHP | Blade | Javascript | CSS | MySQL
Developed a web platform that provides Tarumanagara University students with access to campus and external news, making relevant information easily accessible in one centralized platform.
Link Github : https://github.com/Darrell30/kampus.com.git

Game-The-legacy-of-Samurai | C# | Unity
Developed a 2D action game featuring a samurai on a mission to rescue the captured souls of villagers from a group of bandits.
